Hi Chris,

I've been slogging my way through and should be able get comments to you by COB Tuesday – I had hoped to be done by now, but other work keeps getting in the way! I should be pretty open next Thursday for a call.

Take care,

Teresa

Hi Theresa,

Just checking in to see whether you will have time to finish the roads comments from the NWEA letter (see attached email from 6/26).

I know that you've been busy with travel and working on riparian comments, so I can appreciate how squeezed you are for time. I'm hoping to have reviews from our roads team (me, you, Alan, and Peter) by the end of the day next Tuesday. Please let me know if this time frame works for you and, if you are not likely to be able to finish all the NWEA comments, please let me know how far you are likely to get and I'll develop a contingency plan for making sure we get them all covered.

Also, I'd like to set up a quick discussion with the team a week from today if you are available -- I'll check your calendar.

Thanks!

Hi Chris –

I know what you mean – it's a crazy time of year. I'll be in meetings and on travel the whole of next week, but I'm

hoping to knock out some of the riparian comments for Alan today, and I might have some time tomorrow to devote to the NWEA comments on roads. If there's a particular section you want me to focus on, let me know. Otherwise I'll just start on page one and work my way through. Thanks for your great work and leadership on this Chris –

Take care,

Teresa

Hi Theresa,

I'm wondering whether you would have a chance to start work on the forest roads comments we received from NWEA. Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy I am also working on the rationale and response to comments for landslides, so I will have a tough time getting to the roads comments any time soon. Any progress you could make on the NWEA letter would be much appreciated! Please let me know if this works given your schedule and work load.

Thanks a lot.

Hi Chris,

Attached you will find reviews for letters 58 and 67. It seemed to make sense to review the letters for landslides, roads, and riparian concurrently – so you will find comments for each review topic broken out. I did my best to crosswalk this with the coded public comments. Hopefully what I've done will make sense to you. Alan – I know you want references in a separate word doc to send to TetraTech – I will get that to you too.

Take care,

Teresa

Subject: "Forest Roads and Landslides Team" for OR CZARA Decision

Hi Teresa and Peter,

My understanding is that you are each able to offer a bit of your time to work on the OR CZARA decision this summer and will be able to help support the development of comment responses and the decision rationale for forest roads and landslides portions of the effort.

Attached is a file with the detailed review schedule, which includes milestones due for our "team" on June 24th (landslides) and July 22nd (roads). Also attached is a short document Alan Henning drafted offering suggestions for reviewing OR CZARA public comments. The third attachment is my attempt to pull the landslide-related public comments into separate spreadsheet in order to focus on just those comments. Other documents which will be of use are the decision document and the full spreadsheet, both of which I believe Alan emailed to you on Tuesday.

Alan mentioned that Peter has already reviewed the Oregon Forest Industries Council letter (#77 in the public comment list), so I'm hoping that he can tackle that one. I'm suggesting that Teresa review the Oregon Wild (#58) and Wild Salmon Center et al (#67) letters if possible. I have asked Alan to review the state's submittal, which he has completed, and I have attached his review as a model for you to follow. I will review the NWEA letter (and attachments), as well as review the comments from the other ten organizations/individuals who identified landslides as an area of concern. (If either of you feels ambitious and has the time, I'm sure I could use help especially on the NWEA submittal...)

If you haven't already, you will need to verse yourselves on the forestry components of the proposed decision document and, for the landslides exercise you will need to summarize the public comments received and any referenced literature and other background information. The public comments can be found at <
<http://coastalmanagement.noaa.gov/nonpoint/oregonDocket/publicComments.html>>. I'm not clear as to your level of familiarity with our OR CZARA machinations, so please let me know if you need additional background materials.

If possible, I would like to get your reviews on the landslide-related comments no later than Tuesday, June 17th. That will give me time to synthesize the review findings and prepare to brief the NOAA/EPA team the following Tuesday. I will be sending out additional information for the roads portion of your review by the end of the month, but you can assume it will follow the same general pattern as for landslides. Please let me know if you have any issue with the timeline.

Thank you in advance for agreeing to support our work on this effort. I promise to be as flexible and understanding as possible should you hit any constraints or need to push back on assignments, etc...

Best Regards,

Chris Solloway
